# 25<sup>th</sup>. International Workshop of Phlebology

As many already know this workshop bears some specialties:

***International character – in cooperation with other phlebological societies and the german professional association for lymphology - opinions from many countries are to be heard about, practical topics and courses, semi- live operation course, intimate atmosphere, each participant is also a referent, topic discussions without prepared lectures.***

The convention has the form of a large round table talk without a program elaborated in detail. To each topic you can present your proposals or short lectures. The program, as ever before, is just globally outlined; the particular lectures are not listed, so there is still room for some surprise. The lectures are hold in English or German language, the beamer presentations are supposed to be shown parallel in both languages. A congress DVD will be realeased every year, which you get at the congress

Sincerely  
Z. Várady / Z. Böhm

**Main hall                      Friday    11. 03. 2011**
